2 Purifiers, Safari & Victoria Falls
September 28th - October 9th, 2022

Israel, Jordan & Egypt

Holy Land Trip - No Water Installations
January or February, 2023

CORPORATE SPONSORS

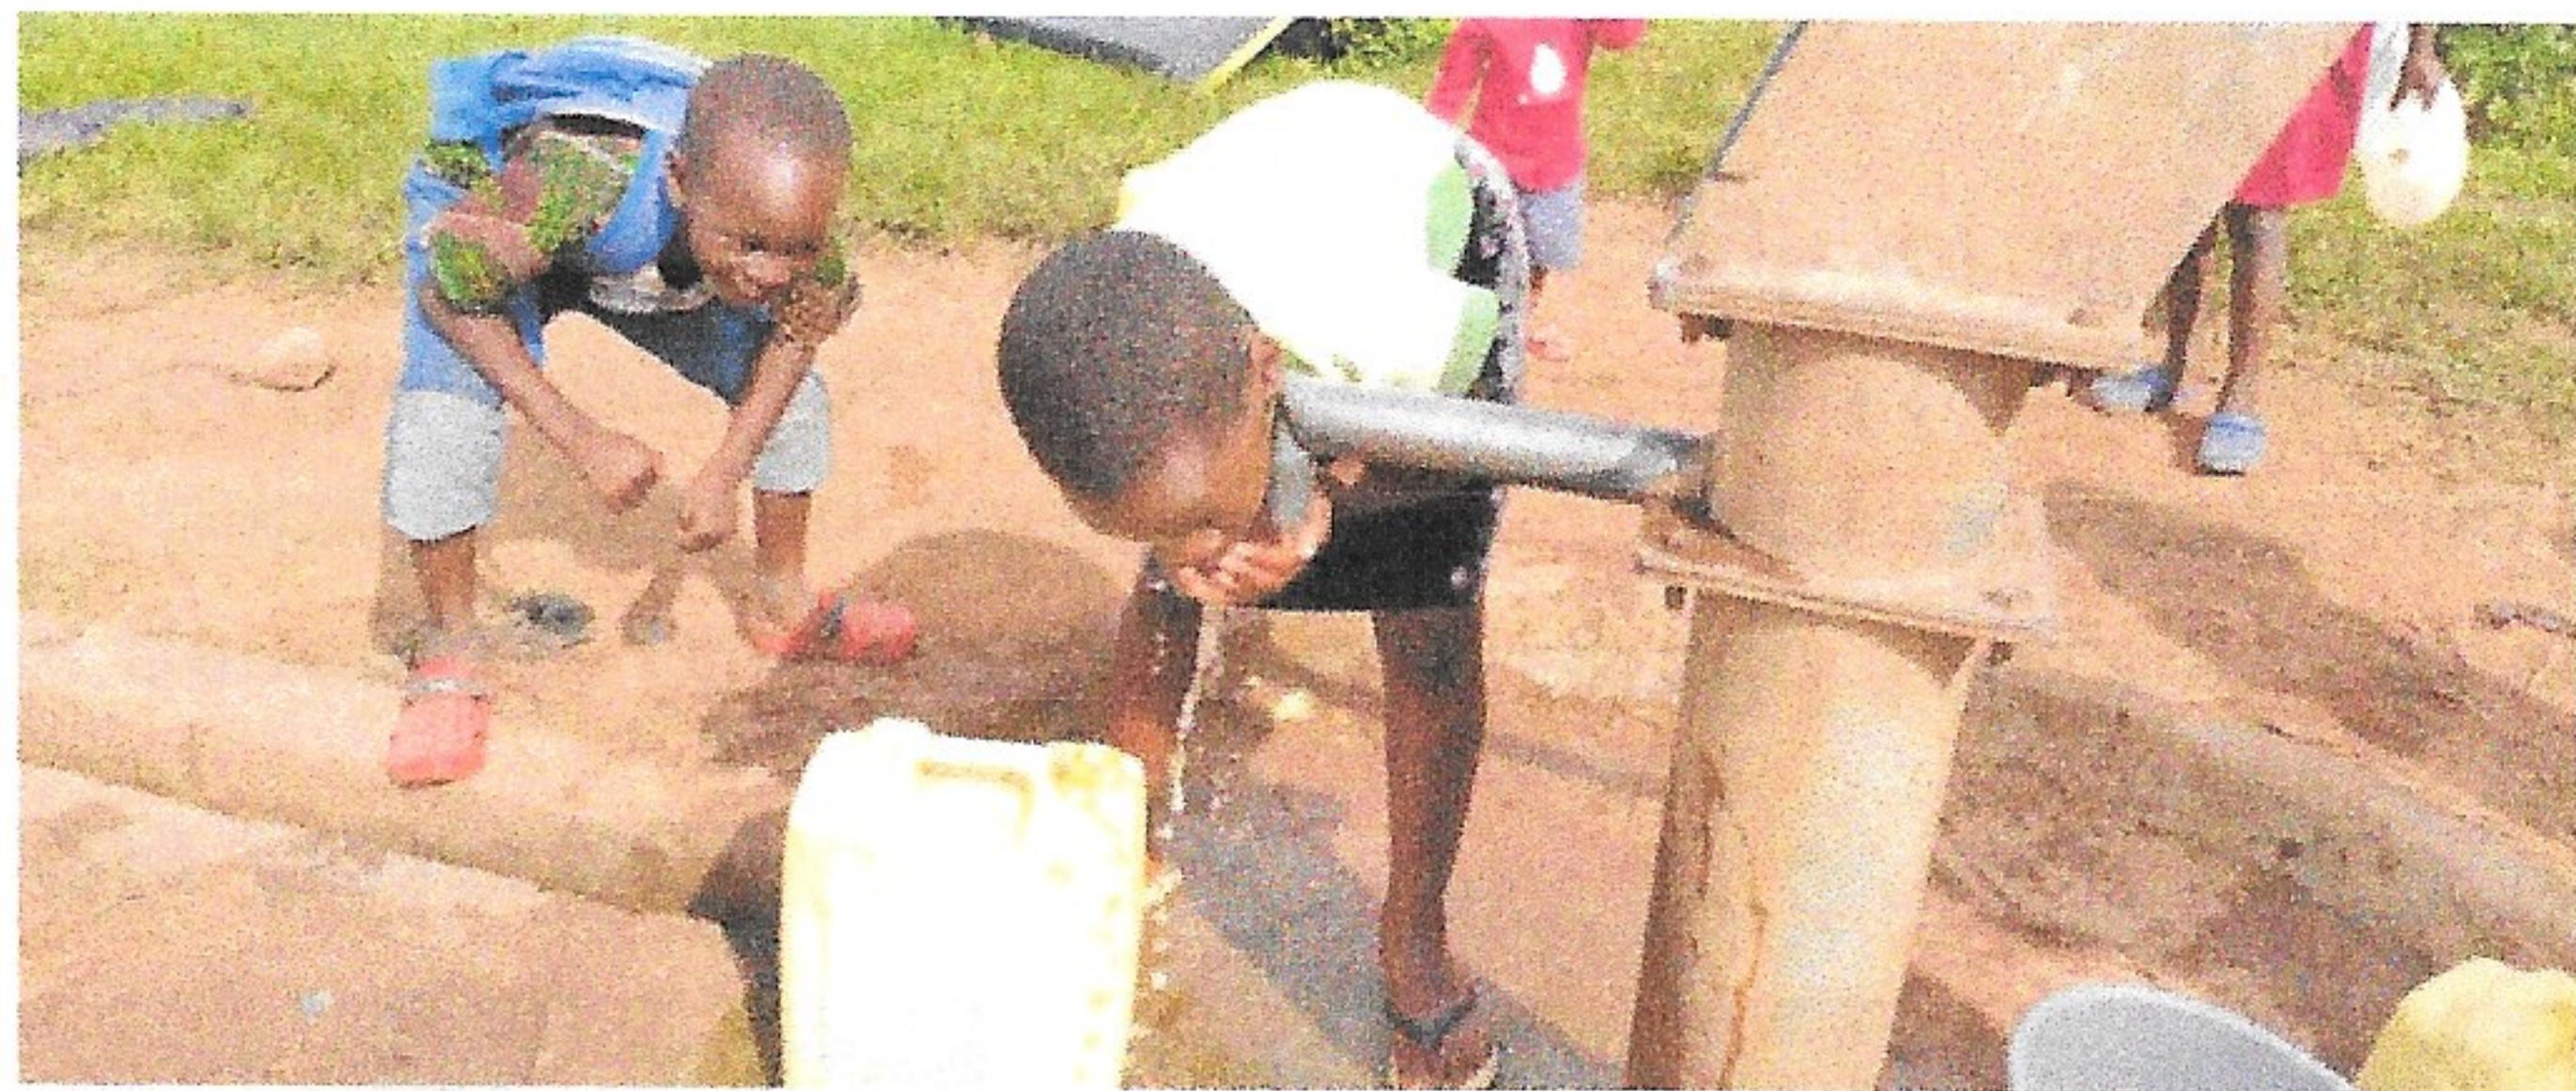

The Story Behind the Mission

Founder and Executive Director, Bill Farrar, an helicopter and airplane pilot and aircraft maintenance technician, installed his first McGuire water purifier during a mission trip to Hurricane Katrina. In 2009, after developing his own two-tank system, Bill had an epiphany.

He knew he had to do more than manufacture the system; he had to take it to the people who needed it most. The horrific earthquake that shook Haiti on January 12, 2010, exploded into a desperate plea for safe water. Fountains of Hope brought purification systems and hygiene training to the ailing Haitians.

Because of the amazing support FoH has received from donors like you, we have installed over 250 FoH purifier systems worldwide, bringing safe water to over 125,000 persons each and every day.

More About FOH Mission Trips

Fountains of Hope is thrilled to announce that because of your generosity and support, we have already installed water purification systems in Zimbabwe, Uganda and Haiti this year. In fact, Bill, Kathy & Dr. Guy Crowder are leaving for Tanzania this week!! During this trip, we will be installing two FoH purifier systems at schools then going and living in a Masai Mara bush village. Nine doctors and 20 team members and staff will provide a medical clinic, health and hygiene education and distribute 100 FoH Filter Buckets to the local families.

FoH would love for you to join us on our next trip to Kenya in July or Zimbabwe in September. These trips will be full of fun, laughs, safari adventures, seeing beautiful Victoria Falls and most importantly providing safe water to the beautiful people of Africa.

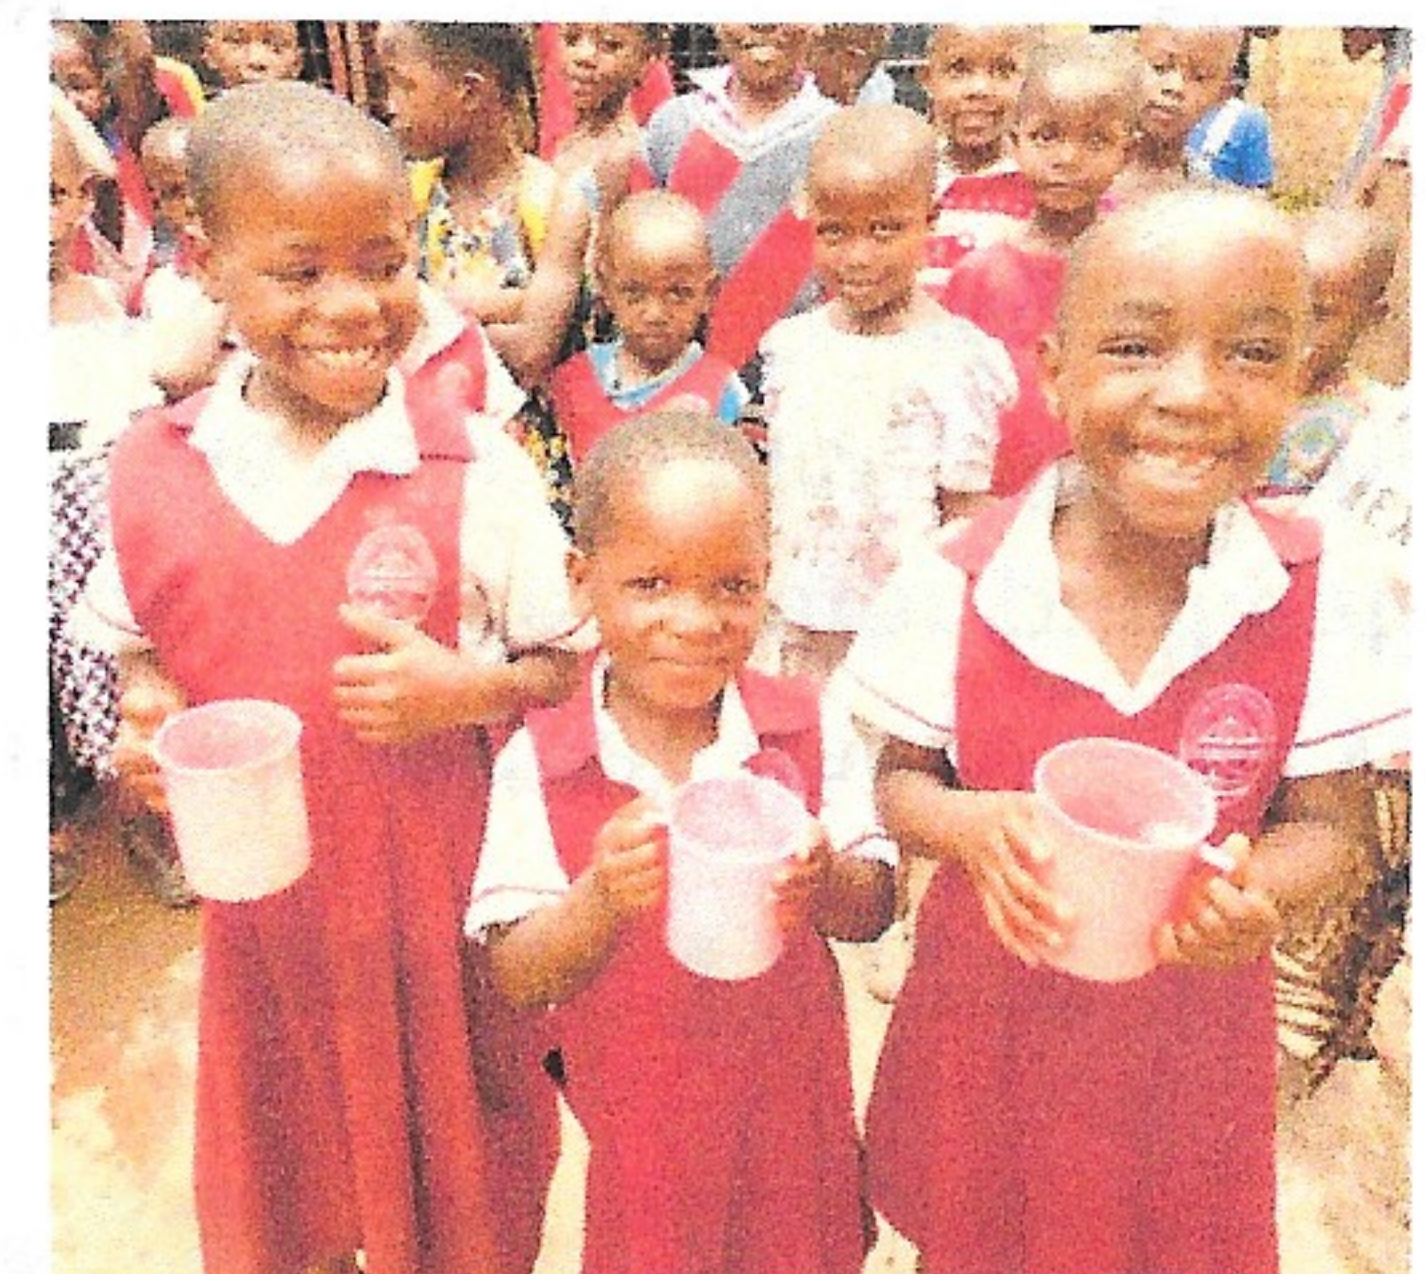

If you are interested in joining FoH on a life changing mission trip, please visit fountainsofhope.org for more information.

Did you know???

785 million people rely on contaminated water sources. Contaminated drinking water can transmit diseases such as diarrhea, cholera, dysentery, typhoid and polio. Diarrheal germs are commonly spread by food or water that has been contaminated with human or animal feces. Diarrheal diseases (such as cholera and typhoid) kill more children than AIDS, malaria, and measles combined, making diarrheal disease the second leading infectious disease cause of death among children under five.

However, because of amazing people like you these stats are changing. Since 2000, over 1.8 billion people have gained access to basic water services. You can help supply or fund safe water to schools, orphanages, medical facilities and churches. Our two-tank FoH Water Purifier System can purify 1,200 gallons in just 20 minutes, providing plenty of safe water for 500 - 5000 people daily!

"Little children, we must stop expressing love merely by our words and manner of speech; we must love also in action and in truth." 1 John 3:18

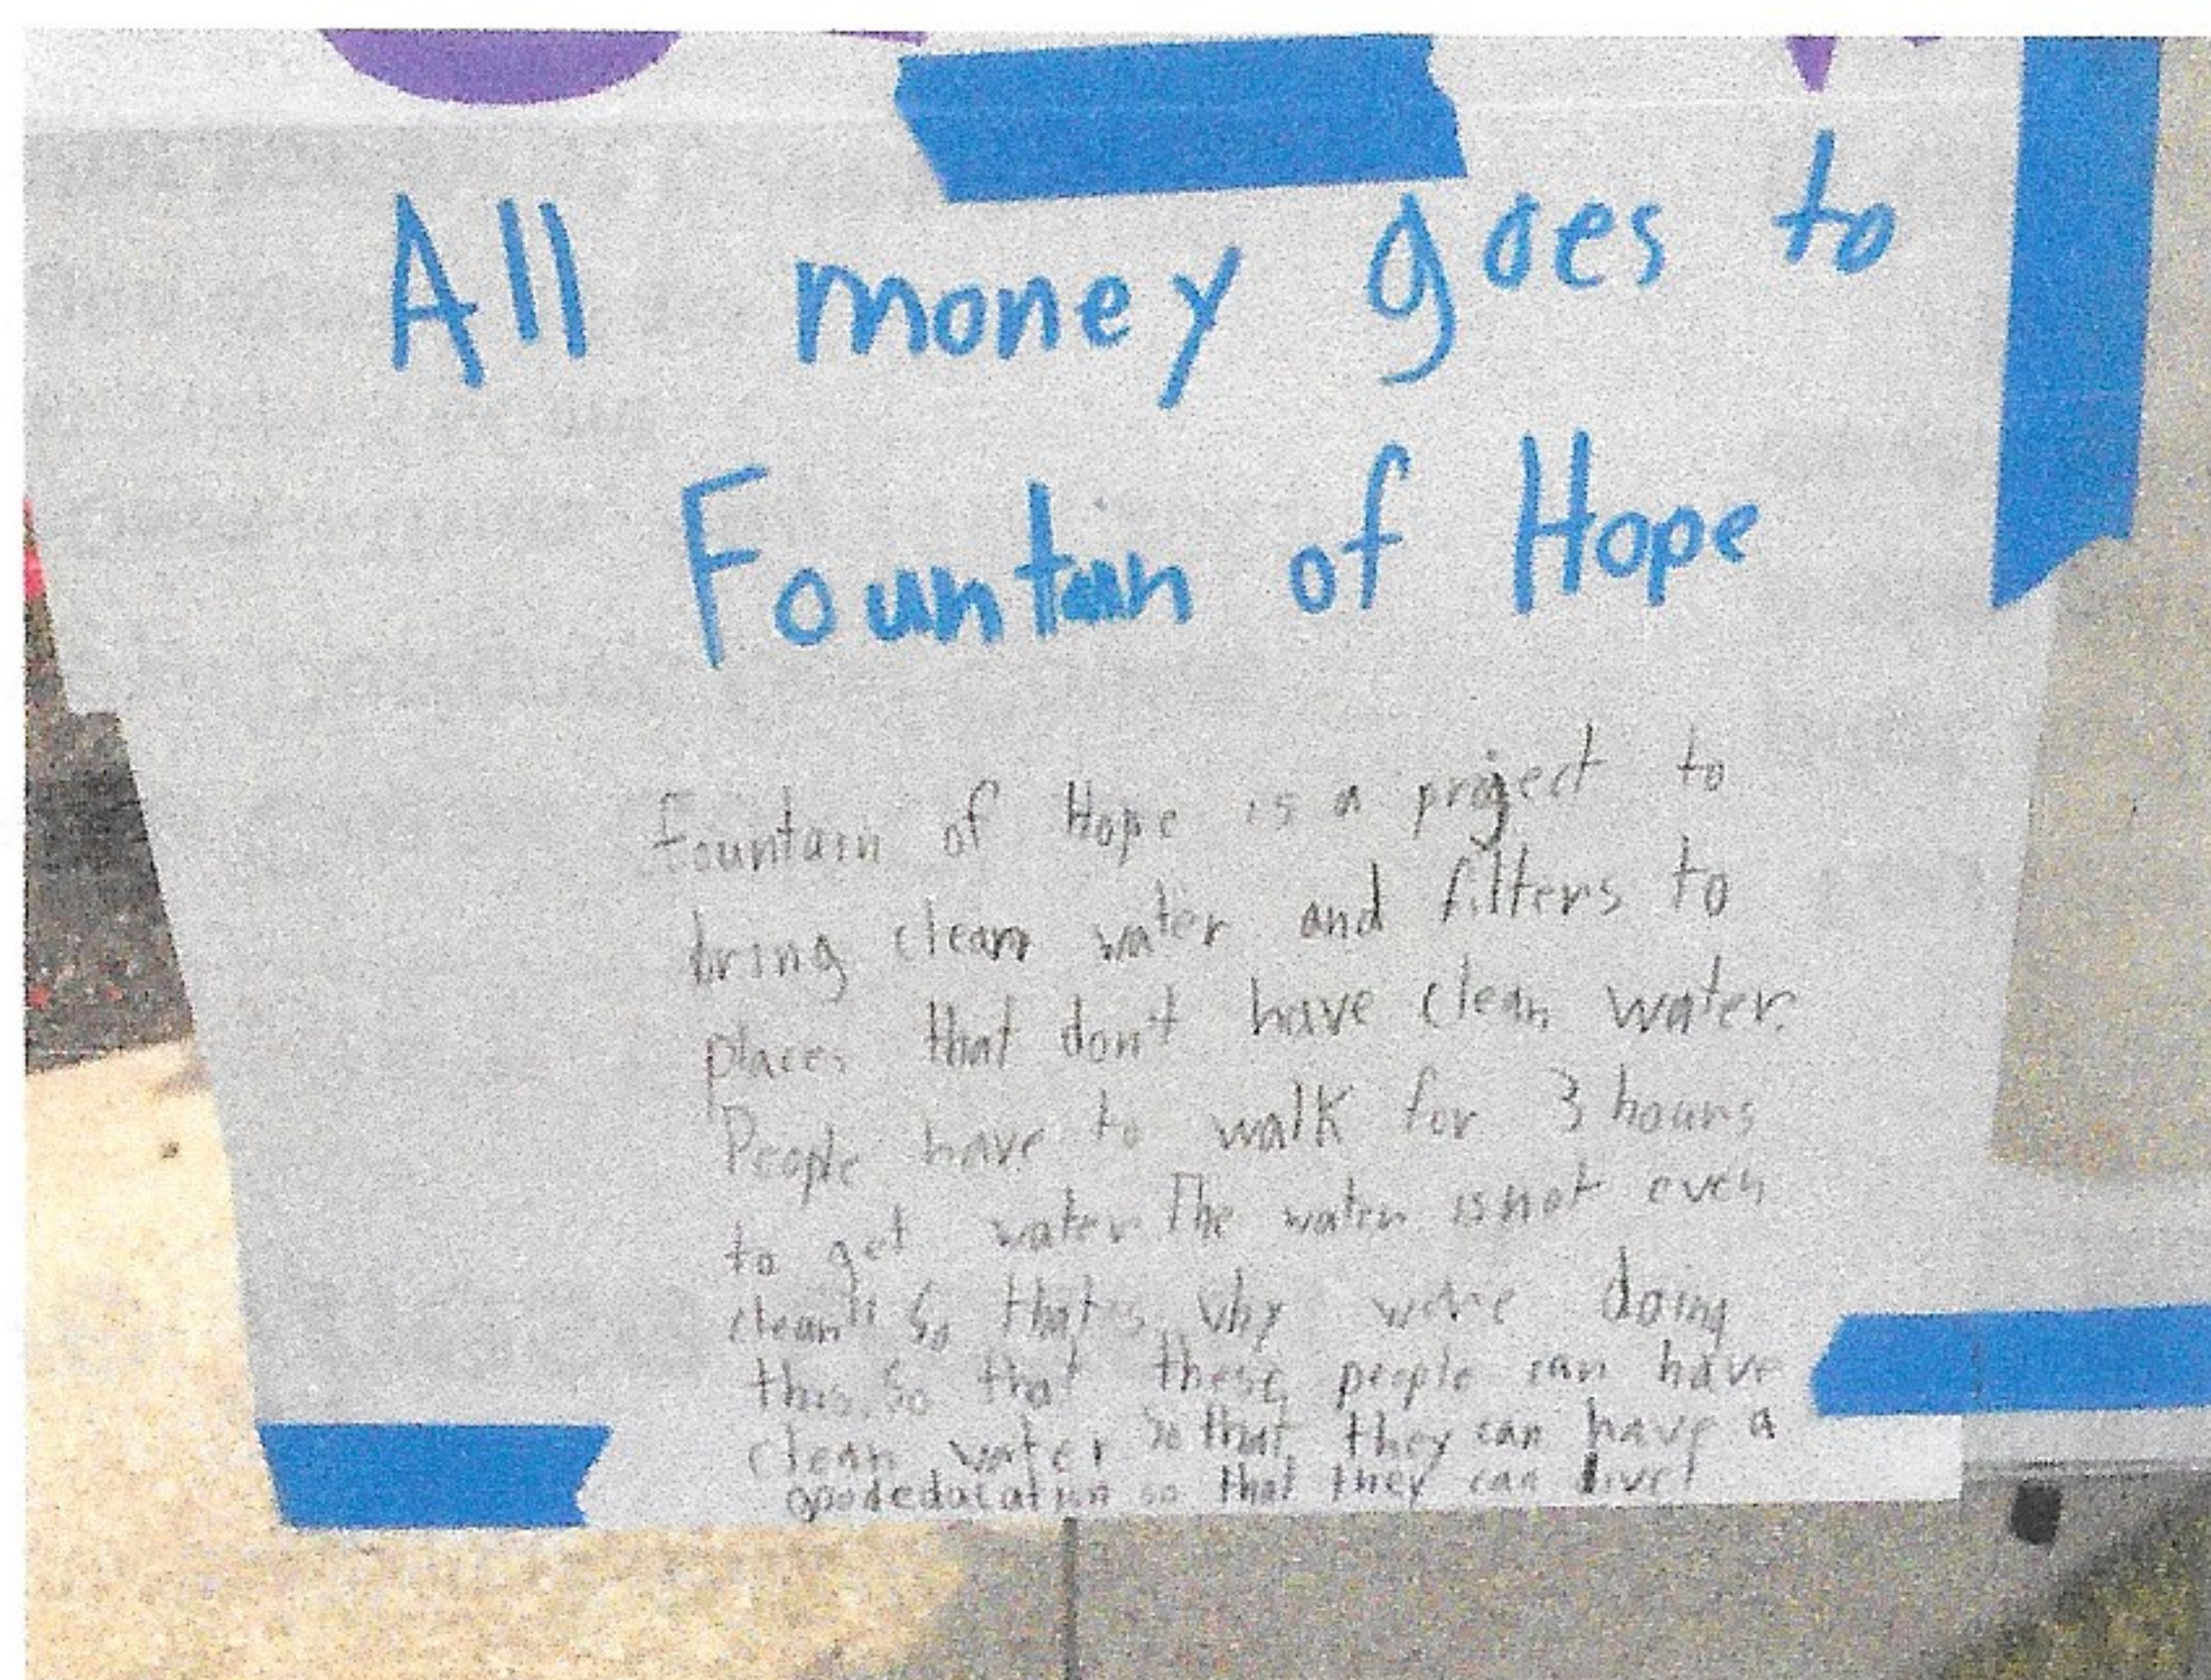

Making an Impact

We are thrilled to announce that because of your generosity FoH has been able to add 11 country directors and team members to Haiti, Kenya, Uganda, and Zimbabwe. Adding additional in-country directors and team members to the FoH team has not only provided jobs for these families, but has contributed to the maintenance of new and previously installed water purification systems. We cannot thank you enough for all your support. None of this is possible without you!

FoH participated in two VBS programs this week. One at New Hope Presbyterian Church in Fishers, and the other at Orchard Park Presbyterian Church in Carmel. Bill was able to speak about the heart and mission of Fountains of Hope to the young ears God placed before him. Ivy, Phoebe, Bea, Zoe, and Ellie were so inspired to help other children around the world that they decided to take matters into their own hands!! A "Candy for a Cause" stand was set up in their neighborhood! See the photos below.

It was a great reminder that you are never too young or old to make an impact!!!

Beautiful children and their families need our help around the world. First, we ask that you pray for our exciting journeys ahead. Next we ask, if you are not already a regular monthly donor, please consider joining as a "Hope Gives Donor" giving every month by going to FountainsOfHope.org and clicking on the Donate Button. Thank you for all you are doing to partner with FoH as we participate in God's work and help his people.
