Safe Water Stations in Le Digue Mathiou, Haiti

Fountains of Hope International

FountainsOfHope.org

Our Mission: Fountains of Hope (FoH) serves God's people by providing safe, life-giving water. FoH leads mission teams that install reliable and sustainable water purification systems around the world. The purification system disinfects 3,600 gallons of water per hour using a cup of table salt, water and a 12-volt battery. Chlorine gas is made from the table salt through electrolysis and injected into the water killing deadly bacteria such as giardia, cholera and typhoid. FoH developed a simple system that provides safe, life-giving water to people in need.

2017 Round-up and Plans for 2018: 2017 was a busy year at FoH. Thanks to the generosity of our donors, sponsors, partners, and volunteers we went on a total of seven trips and installed 17 purifiers! This year, we installed systems in communities in Haiti, Kenya, and Zimbabwe. Those purifiers serve at least 10,000 people every day! We installed in sites that were easy to access, like schools, orphanages, medical facilities, and places of worship. Our two most unique trips this year were in Haiti, where we completed our first multi-station system in Le Digue Mathiou, and where we built a cistern, roof catchment and installed a purifier system at a medical facility in Les Cayes, where they were suffering from a cholera outbreak (details on page two). In 2018, we've planned six+ trips and our goal is to install 25 purifiers. With your help, we'll bring safe drinking water to thousands of additional people. Would you like to change your life forever by joining us on a mission? Call FoH at 317-289-9170 to register.

Transforming Lives Through Safe Water

JOIN US ON A TRIP! Register at 317-289-9170

Haiti: February 22-28, 2018

Install 2 systems in Merger, Verrettes

Leader: Emily Klever, Cost \$2,100

Haiti: Early April, 2018

Install 2-3 systems

Leader: Bill Farrar, Cost \$2,100

Zimbabwe: May 5-20, 2018

Install 2-3 systems at schools

Leader: Bill Farrar, Cost \$3,495

Uganda: July 2018

Install 3-4 systems in Jinja, Uganda

including at school where Kisses from Katie originated.

Leader: Nancy Harbron, Cost \$3,495

Haiti: Early August, 2018

Install 2-3 systems with Rotary

Leader: Bill Farrar, Cost \$2,100

India: Early December, 2018

Install 2-3 systems serving widows, orphans, lepers, and the persecuted church in Southern India

Leader: Bill Farrar, Cost \$3,495

Serving 2,000 People in Haiti: October, November, and December were big months at FoH. On our 34th mission to Haiti (Oct. 22-27), we installed our first multi-station site in Le Digue Mathiou, partnering with Children's Lifeline Mission. Two stations, each with two 600-gallon tanks, were installed on this trip. The stations are about 1/2 mile apart, and share a common purifier. These stations serve over 2,000 people, and all 4 tanks are emptied every day! You may have seen on our website that we plan to install 10-15 purification systems total for this project, which will serve approximately 9,000 people every day! If you'd like to help fund this project, visit our website home page, where you'll see the project listed with a map, and click the green "Fund a Project" button.

On the Ground During a Cholera Outbreak: Our 35th Haiti trip (Nov. 2-10) was to a community in the mountains near Les Cayes, where they were suffering from a cholera outbreak. The 2-tank system was installed at Gros Morne Church, a school, and a medical center, all of which benefit tremendously. The system serves about 500 people every day and is fed from a cistern that FoH built so that there will still be stored water when they're affected by drought. The purifier system was sponsored by Vessels of Mercy Medical Ministry in Virginia. Nursing students from Moorhead University, KY also donated much needed cholera medical supplies. Unfortunately, two young boys, aged 4 and 14 died during the cholera outbreak, which further stressed the need for safe water and medical supplies in the region. We continue to pray for all of the families affected.

Safe Water for Children and Families: On FoH's 5th trip to Zimbabwe (Nov. 25-Dec. 9), two, 2-tank purification systems were installed, and a third left-behind for our country director Shepherd Zhou to install. The first system, installed in Cheredzi, was sponsored by The Rotary Club of Indianapolis, and the second, installed in Gweyru, was sponsored by the Rotary District 6560 Foundation. Each of these systems were installed at primary schools (pre-k-7th grade) and serve over 500 people a day! The third will be installed by Shepherd at his church, Joyous Christian Church. It was sponsored by the East 91st Street Foundation, and will begin serving the local community as soon as Shepherd has finished drilling a well.

Become a "Water is Life" monthly donor, and make a commitment to help these communities and others like them obtain safe drinking water! Visit fountainsofhope.org/donate to sign-up.
